

An integral part of every event organized by **Conference Partners** is excellent comprehensibility of the speakers and discussion participants, suitable ergonomics of the space with respect to AV equipment, quality interpreting service and a high standard of technical support. Thanks to our long-term cooperation with leading AV companies, we are always able to offer the optimal solution for your event. As a part of our additional services we offer to make a professional sound and video recording of your event which can be made accessible on the Internet for later.

As a standard practice we offer a technical supervisor, who is an experienced member of our company, to ensure the service quality of the AV provider during the preparation and the actual event as well.
